receiving a voice query at a telematics unit in a vehicle;

converting the voice query to a digital signal;

transmitting the digital signal from the telematics unit to a computer-end recipient at a call center node in communication with an information database, wherein the digital signal is sent to the computer-end recipient at the call center node via a digital packet data protocol over a wireless network;

extracting a computer-readable command from the digital signal;

executing the extracted computer-readable command at the call center node;

accessing the information database based on the computer-readable command;

formulating at least one response to the computer-readable command using the computer-end recipient;

transmitting the at least one formulated response via the digital packet data protocol over the wireless network to the telematics unit, wherein the digital signal transmitted to the computer-end recipient and the formulated response are each compressed at different

Art Unit: 2617

compression ratios based on whether the digital signal or formulated response is audibly played in a vehicle, **and wherein when the at least one formulated response is to be audibly played in the vehicle the digital signal is compressed using a compression ratio that is at least twice the compression ratio used to compress the at least one formulated response;** and

translating the at least one formulated response to an analog format for playback in the vehicle.

21. **(Currently Amended)** A method for responding to digital vehicle requests, comprising the steps of:

receiving a voice query at a telematics unit in a vehicle;

converting the voice query to a digital signal;

compressing the digital signal at a particular compression ratio that is established for transmitting voice queries that are not audibly reproduced;

transmitting the digital signal from the telematics unit to a remote computer-end recipient via a digital cellular packet data protocol;

parsing the digital signal using the computer-end recipient to determine an inquiry;

formulating at least one response to the inquiry;

compressing the at least one response at a compression ratio that is established for audible playback in the vehicle, which is **two or more times** less than the particular compression ratio;
